

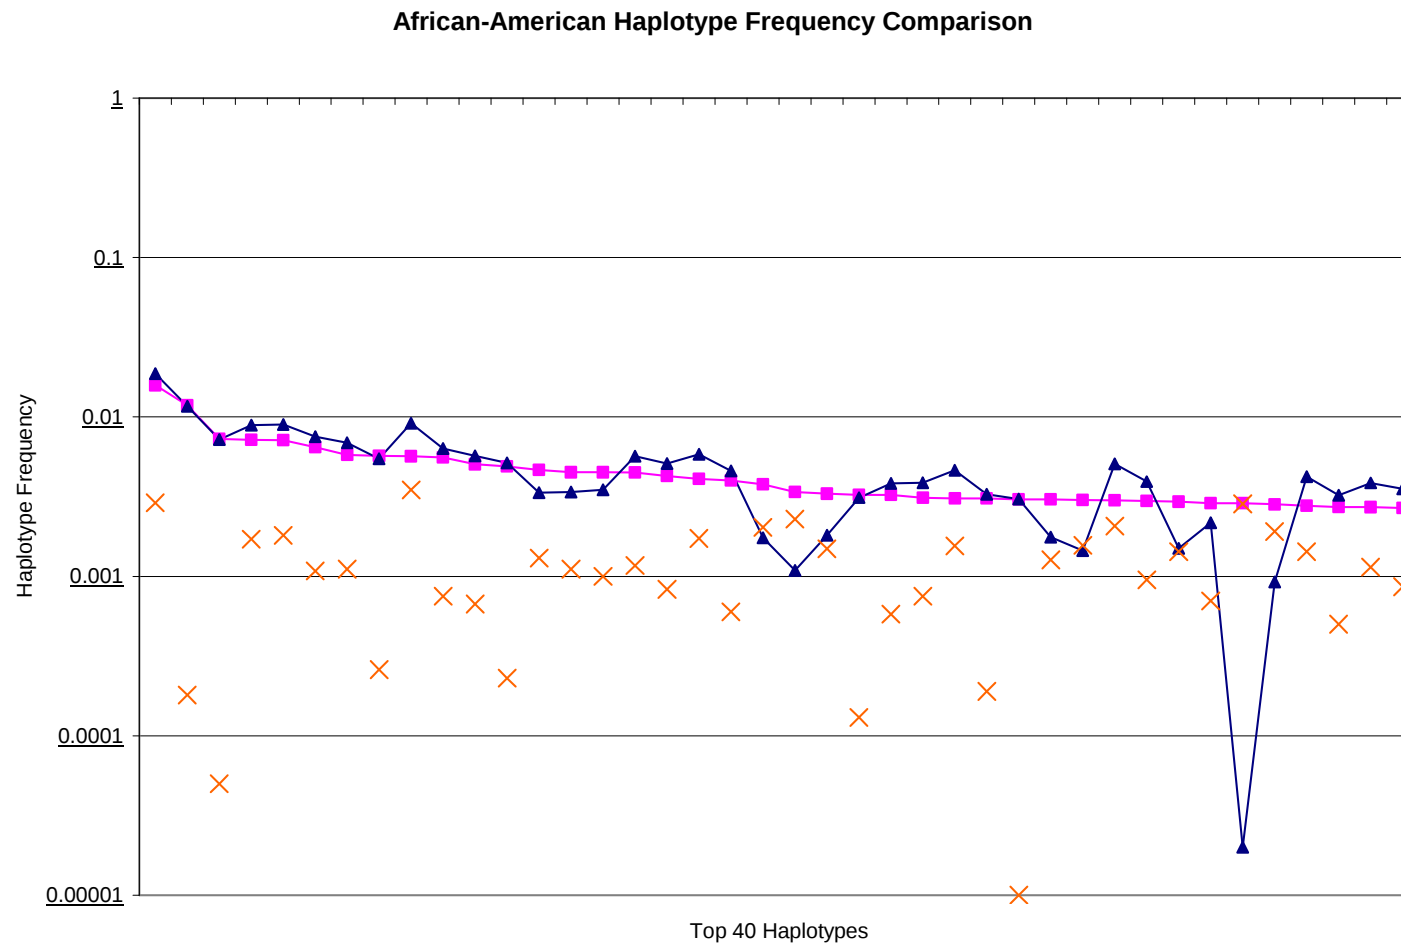

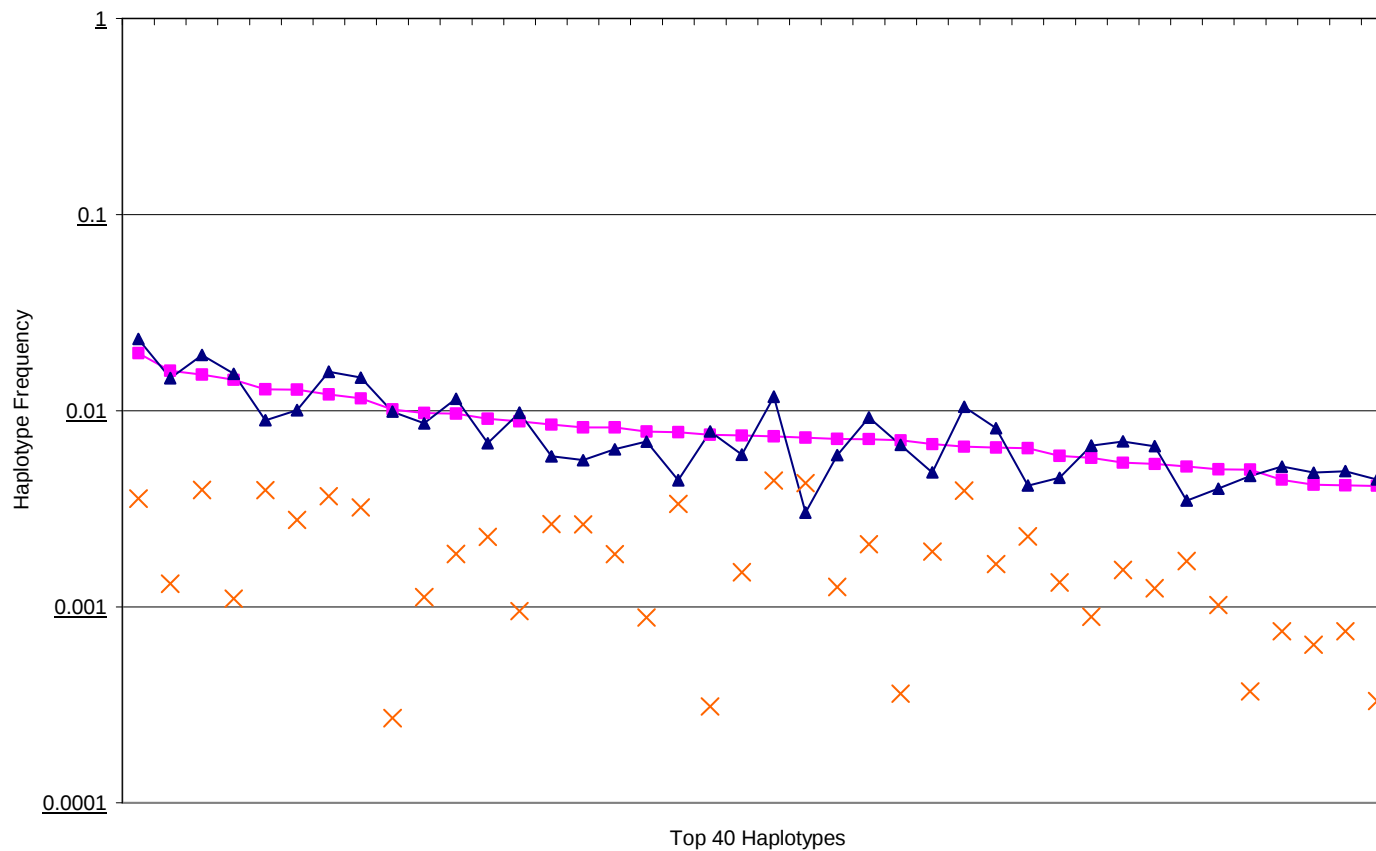

Figure 2.

Comparison of A-B-DRB1 haplotype frequencies between full registry low resolution-typed samples and the current study for the first 40 haplotypes of each ethnic group. All high resolution typing in the current study were converted to low resolution (2-2-2) for this comparison.

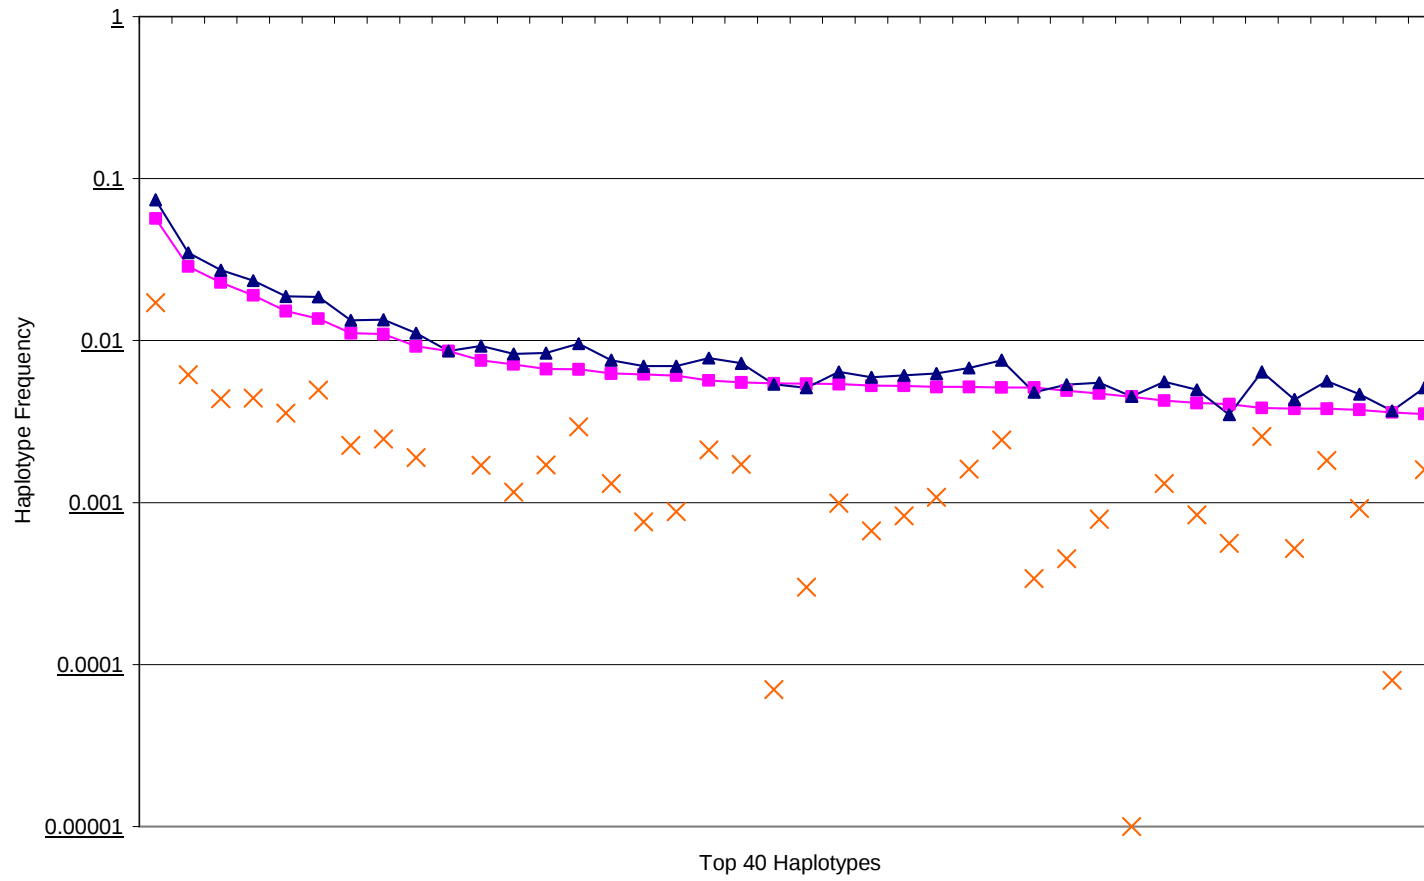

Key: Full registry [a square], this study [a triangle], difference [an x].

Asian Haplotype Frequency Comparison

European-American Haplotype Frequency Comparison

Hispanic Haplotype Frequency Comparison
